

Ali Abbas Qazi

Cybersecurity Student | Offensive & Defensive Security
Islamabad, Pakistan | aliabbasqazi@gmail.com | linkedin.com/in/ali-abbas-qazi | github.com/Ali-Abbas-Qazi | ali-abbas-qazi.github.io

SUMMARY

Second-year BS Cybersecurity student at HITEC University with hands-on experience across both offensive and defensive security — penetration testing, threat detection, incident response, and digital forensics. Vice President of the HITEC Cyber Community, leading workshops, CTFs, and security initiatives for the student body. Documents every project as a public, evidence-backed report with findings and remediation. Seeking a cybersecurity internship.

TECHNICAL SKILLS

Security Operations & Defense: Threat Detection, Incident Response, Log Analysis, Phishing Analysis, Digital Forensics, Vulnerability Assessment, SIEM Fundamentals
Offensive Security & Recon: Penetration Testing, Web Application Security, Footprinting & OSINT, Network Discovery & Enumeration, SQL Injection Testing, Password & Hash Cracking, WAF Detection
Tools: Nmap, Zenmap, Nikto, WhatWeb, wafw00f, dnsrecon, WHOIS, John the Ripper, Wireshark, Kali Linux, VirtualBox, Git
Programming & Scripting: Python, C++, Java, SQL, Bash
Frameworks & Standards: PTES, NIST SP 800-115, NIST Cybersecurity Framework
Operating Systems: Linux (Kali, Ubuntu, WSL), Windows

EXPERIENCE

Cybersecurity Intern — Networkwalks, Islamabad Sep 2026 – Present

- Run penetration tests on web applications, finding issues like SQL injection, authentication bypass, and exposed data.
- Scan and map networks with Nmap, Zenmap, and Nikto to spot open services and misconfigurations.
- Write clear penetration-test reports with risk-rated (CVSS) findings and remediation steps, published on GitHub.

Vice President — HITEC Cyber Community (HCC), Islamabad Jan 2026 – Present

- Lead a team to run technical workshops, Capture the Flag (CTF) competitions, and security-awareness sessions.
- Mentor junior members and build skill-development pathways for the community.

Red Team Co-Head — HITEC Cyber Community (HCC), Islamabad Sep 2024 – Dec 2025

- Co-led the university red team on penetration testing and vulnerability assessments.
- Ran hands-on workshops on ethical hacking and defensive techniques.

PROJECTS

Hospital Web Application Penetration Test (Black-Box) github.com/Ali-Abbas-Qazi

- Bypassed the login with SQL injection to reach restricted patient data without credentials, and cracked 3 password-protected files to access sensitive records.
- Found an exposed database backup (staff and shareholder data) with Nikto; delivered a report with 6 risk-rated (CVSS 3.1) findings and fixes.

Reconnaissance & Network Discovery Assessment github.com/Ali-Abbas-Qazi

- Profiled a live web target with standard recon tools (WHOIS, dnsrecon, WhatWeb), flagging missing security headers, email-spoofing gaps, and outdated software.
- Mapped 11 devices on a network using Nmap and Zenmap; reported 6 risk-rated findings and fixes, following PTES and NIST SP 800-115.

PDF Password Recovery & Hash Analysis github.com/Ali-Abbas-Qazi

- Recovered PDF passwords through dictionary attacks with John the Ripper; documented the process and what it shows about password strength.

Insider Threat Detection Tool github.com/Ali-Abbas-Qazi

- Built a Python tool to detect behavioral anomalies and flag potential insider-threat indicators.

Cybersecurity Lab Environment Setup github.com/Ali-Abbas-Qazi

- Built an isolated Kali Linux testing lab in VirtualBox on a private network with static IP and snapshots; diagnosed and fixed a Linux network connectivity issue.

EDUCATION

BS Cybersecurity — HITEC University, Islamabad Sep 2024 – Jul 2028 (expected)
A Levels — Beaconhouse School System, Islamabad 2022 – 2024
